

Byne Meeting Table

Byne Meeting Table

An expression of modern collaboration

Versatile and design-forward, Byne Meeting Tables empower modern teams and adapt seamlessly to both classic and contemporary meeting spaces. Wire and cable management enhance visual clarity, while multiple customisable leg options make it a cohesive extension to Byne System.

Provide flexibility and support collaboration

Byne Meeting Tables accommodates both small huddles and larger meetings, providing a flexible touchdown space for quick teamwork-focused sessions or longer, more focused meetings. Choose from the rectangular option for more traditional meetings or the boat shape for a more democratic feel that supports video conferencing and in-person work sessions alike.

Byne's different configurations allow it to support video conference and in-person work sessions.

Enjoy aesthetic and functional freedom

Select the leg configuration that mirrors your design vision and functional needs. With four distinctive leg styles, two different shapes and three surface material options – including premium veneer – Byne Meeting Tables have the power to shape any meeting environment. Embrace contemporary minimalism or complement more traditional interiors to create a cohesive, intentional aesthetic.

With a variety of leg style options, finishes, and veneer options, Byne Meeting Tables offer a truly customisable solution to compliment any space.

In addition to hosting larger, longer meetings, Byne Meeting Tables provides a flexible touchdown space for quick teamwork-focused sessions and smaller huddles.

Clean cable management for visual clarity

The discreet built-in cable and wire management runs through the table's centrally located middle leg, creating a clean, professional workspace. In large groups, the entire team can enjoy accessible integrated power with ease.

Accessible integrated power sets teams up for success.
